

MAINTAIN DOT 4

Super High Performance Brake Fluid for hydraulic brake systems and clutch actuation in passenger cars, trucks and motorcycles.

Description

MAINTAIN DOT 4 is a synthetic high performance brake fluid and clearly exceeds the requirements of DOT 4 regarding boiling characteristics. Therefore MAINTAIN DOT 4 offers additional protection against vaporization even under server conditions.

Application

Vehicle manufacturer's recommendations are to be obeyed when using MAINTAIN DOT 4. Do not use MAINTAIN DOT 4 in any kind of hydraulic brake or clutch actuation systems if a silicon or mineral oil based fluid (e.g. LHM or DOT 5) is specified.

MAINTAIN DOT 4 is miscible and compatible with conventional branded brake fluids of same technology or performance. However, mixing with other products should be avoided in order to fully utilize the product's benefits. A complete change of the fill is recommended when converting to MAINTAIN DOT 4.

For information on product safety and proper disposal please refer to the latest Material Safety Data Sheet.

Advantages/Benefits

- Universal use in both passenger car and heavy duty application if a DOT 4 break fluid is specified
- Additional protection against high temperature vaporization
- Protects the entire hydraulic brake and clutch actuation system against deposits and corrosion
